

2017 MUSIC THERAPY PROGRAM: COURSE & ENROLMENT INFORMATION

Music Therapy is the planned use of music-based interventions to assist clients in achieving non-musical therapeutic goals. It is an allied health profession, and can be effective for clients with a range of needs - social, emotional, motor, sensory and cognitive.

The New England Conservatorium’s Music Therapy Program, established in 2011, is the only one of its kind in the New England area. It provides individual and group music therapy sessions for children and adults with a range of needs, in addition to programs with partners PEDAL and Armidale High School Support Unit.

NECOM’s Music Therapy Program is delivered by registered Music Therapist, Hannah Rowland M RMT, MMusThy, BMus (Qld). Hannah presents individual and group music therapy programs for children and adults with disability, brain injury, age related diseases, early childhood music programs and early intervention programs. She also includes residential aged care work – the planned, implemented and evaluated individual and group music therapy programs for older adults with dementia and other age-related diseases; and working with children on the Autism Spectrum to improve communication, social skills, gross and fine motor skills and sensory integration.

Music therapy programs can be offered depending on the needs of the client eg:

- Individual sessions – 30 or 45 minutes
- Group Sessions – for clients or group work with family or developing relationships with others – 45 minutes

All clients are provided with:

- An initial assessment that will include a report and an individually designed music therapy program
- 9-week block of sessions during each term (4 school terms each year)
- Evaluation – an evaluation of whether goals have been met and any recommendations for future input
